Microsoft to Host First Meeting of Microsoft Dynamics™ NAV (formerly known as Navision) Arizona Users Group

Radiant Technologies and Silverware are working together to foster a vibrant Microsoft Dynamics NAV user community in Arizona; customers of both Microsoft Dynamics ERP value-added resellers to benefit.

Phoenix, AZ, – March 10, 2010 – Microsoft, along with its premier Dynamics ERP solution partners Radiant Technologies and Silverware, is sponsoring the first meeting of the Microsoft Dynamics NAV Arizona Users Group. The meeting will be held on April 9, 2010 from 9:00 a.m. to 3:00 p.m. at the Microsoft office in Phoenix.

This full day of education and networking provides NAV users throughout Arizona an opportunity to enhance their usage of the system. Dave Moebes, manager of the leading Microsoft Dynamics partners in Microsoft's Desert Mountain region, will be the keynote speaker. "User groups are an excellent way for our customers to maximize the value of their Microsoft Dynamics NAV solutions," says Mr. Moebes. He added, "By meeting and discussing Dynamics NAV solutions with their peers, users often find better ways to streamline activities or to address challenges they face in their own businesses."

Bruce Lancaster, Senior Financial Analyst with Greenleaf Compaction and a veteran Dynamics NAV user will share some ways his company takes advantage Microsoft SQL Server Reporting Services. Mr. Lancaster has been very active in organizing the NAV user community in Arizona. "We've done some impressive reporting with SQL Server that brings the data in NAV to life and helps us make better business decisions. I want to share what we've done so we can get ideas from other users," he said about the presentation he will make.

David Thikoll, Director of Business Development for Silverware, said his company supports user groups to facilitate “low-cost, high impact interactions with other users that can increase the return on Dynamics NAV investments. Since NAV is so flexible, it is very beneficial to learn how other users are taking advantage of its capabilities.”

Michael Anderson, CEO of Radiant Technologies, comments “since our acquisition of Clifton Gunderson’s Dynamics NAV (Navision) practice in February, we have 40 new clients in Arizona, and this is a great opportunity for us to add value to the entire NAV user community in Arizona. The benefits of networking with user peers are well-known. I am also very excited to meet our new customers face to face.”

For more information or to register visit the registration Web site at www.clicktoattend.com (enter Event Code 146555), e-mail usergroup@silverw.com or usergroup@radiant.us.com, or call (480) 423-8324. Anyone with an interest in Microsoft Dynamics NAV is invited to attend but all attendees must RSVP. There is no charge and a gourmet lunch will be served.
